VA Launches New App

JACKSON, MISS. — The G.V. (Sonny) Montgomery VA Medical Center announced that Mississippi Veterans have access to a new mobile app enabling them to get instant access to VA health care information right from their phone.

“We are committed to a connected health strategy that puts Veterans at the center of health care,” says Dr. David Walker, Medical Center Director. “Users of the new “MyVA Info” app will have easier access to health information, guidance and resources when they need it most.”

The “MyVA Info” app offers mobile-friendly features to help Veterans, including:

- Healthcare news from [facility name]
- Find VA healthcare (and other VA) locations quickly
- Easily locate VA resources including:
 - o How to apply for VA health care
 - o Information on the Caregiver Support Program
 - o How to locate even more mobile apps in the VA App Store

The “MyVA Info” mobile app enables access to a myriad of VA healthcare and facility services. We’ve listened to what our Veterans have said. We’re proud to provide them with this information with a touch of a button,” says Walker.

The app is now available for iOS and Android devices.

###

About the South Central VA Health Care Network

The VA is the largest medical system in the United States, providing service to more than 9 million Veterans across 1,243 facilities including hospitals and clinics. The South Central VA Health Care Network (VISN 16) serves more than 600,000 enrolled Veterans residing in the states of Mississippi, Louisiana, Arkansas and portions of Texas, Oklahoma, Missouri, Alabama and Florida. Health care services are delivered through an integrated system of eight hospitals, 61 outpatient clinics, six Community Living Centers and four domiciliary Residential Rehabilitation Treatment Programs.
